Re: Gas Analysis System

To Whom it May Concern:

This letter serves as verification that on June 20, 2018 Big Ox Energy placed an order through NCorp Services (Purchase Order Attached) for a gas analysis system for continuous measurement of Hydrogen Sulfide, Methane, Carbon dioxide, and Oxygen, with Babcock & Wilcox MEGTEC LLC (MEGTEC).

MEGTEC's scope of supply is per proposal #63561R3 dated June 20, 2018. Generally speaking, it consists of an outdoor shelter/building, both heated and air conditioned, lighted, and insulated for housing of the various gas analyzers.

MEGTEC received a 50% down payment on July 17, 2018 and has scheduled the equipment to arrive on October 3, 2018 for installation by others.

Sincerely,

BABCOCK & WILCOX MEGTEC LLC
